ABOUT US:

Al Jameel Switchgear established in the year of 2007 at Umm Al Quwain. The company has achieved accreditation for its Quality Management System in accordance with the ISO 9001:2015 standard. Our principal activity is manufacturing of Power and Control panels and designing of controls as per client's enquiry, designing of program, Commissioning of panels with testing and After-sales service. We provide services in all areas of electrical works, domestic, commercial, and industrial installations and maintenance.

Our no compromise approach to our work shows in the finished product. From commercial and retail fit-outs to residential buildings and industries, each project is treated the same. Our company has a well-equipped workshop and excellent workmanship. Experienced engineers, qualified electricians and office based support staff ensure all our works successful.

We owe our success to our customers who have patronized our services with confidence and trust. We believe strongly in providing quality service on time and within budget while maintaining safety and cooperating with those involved.

AL JAMEEL SWITCHGEAR is dedicated to craftsmanship and quality and is committed to providing ever-improving services to all of our existing and future clients. The company's well-equipped workshops and excellent workforce enable us to turn around a project in order to meet any tight schedules. All equipments we supplied are manufactured using sound engineering practices that are associated with IEC standards for the manufacture of Low Voltage Switchgear & control panel. Our design and manufacturing techniques combine together at all time to guarantee the best quality at our lowest possible prices. Our product is directed at quality and reliability as well as technical advancement in design and performance. You can be certain that we will supply you or your clients with equipments that are long lasting and have a minimal installation, operational and maintenance costs.

MCC/PCC PANELS

For larger enclosure, multi-section switch board and MCC's, we use a module framework system. The system is manufactured by ELSTEEL / RITTAL, and comprises a framework enclosure encapsulated by screw-on panels of sheet steel, hinged doors (fitted with lockable handles if required), together with many other refinements to suit your individual needs. The system is fully extendable to suit your future needs. With the metal work being our own system Form 2 through to Form 4 Type 7 can be achieved. We design, manufacture low voltage switchboards to suit all requirements. Our modular approach to manufacture, developed and tested in-house, uses predrilled, punched and taped metal work that ensure total quality control and standardized assembly process. This consistent approach based on basin predesigned building block leads higher quality, and reduces lead time.
